SELF-DRILLING SCREWS

DESCRIPTION

Self-Drilling Screws are essential components for securing single-layer and multi-layer drywall panels, insulation, and accessories to heavy gauge metal structures. They are specifically designed for use with wallboards assemblies. **Applications:** Plasterboard screws play a crucial role in efficiently and securely connecting various elements of drywall systems, ensuring reliable installations in a variety of applications. Self-Drilling Screws are ideal for quickly attaching facing materials to steel framing using a power screwdriver in drywall systems installation. They are suitable for use in all types of drywall partitions, Shaftwall, liner walls, and drywall ceilings.

Material: Hardened Steel, **Finish:** Zinc Plate and Black Phosphate

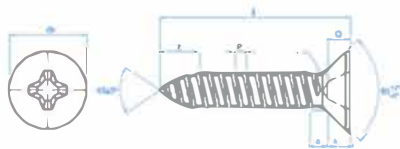

PRODUCT DATA

K2E3.5-1

Length	25mm	35mm	45mm

Item Code	K2E2501	K2E3501	K2E4501

K2E3.5-2

Length	25mm	35mm	45mm
Quantity (pc)	1000	1000	1000
Item Code	K2E2502	K2E3502	K2E4502

SPECIAL
CHARACTERISTICS
RUST PROTECTION

- Philips head recess • Special drill point

Black Phosphate: Salt Spray Test 24hrs

Zinc Plated: Salt Spray Test 48hrs

These screws comply with:

STANDARDS

- ASTM C 1002 – 98 standard specifications for steel drill screws for application of gypsum panel products or metal plaster bases.
